The reception of Many Lys's book *Roots and Wings* has been very good. Many reviewers, booksellers, and librarians have _____ the book, and it won the Asian/Pacific American Award for Literature.

Which choice completes the text with the most logical and precise word or phrase?

- (A) attacked
- (B) recommended
- (C) overlooked
- (D) misunderstood

The following passage is adapted from Mary Seacole's 1857 autobiography *Wonderful Adventures of Mrs. Seacole in Many Lands*.

That journey across the Isthmus [of Panama], insignificant in distance as it was, was by no means an easy one. It seemed as if nature had determined to throw every conceivable obstacle in the way of those who should seek to join the two great oceans of the world.

According to the passage, what does the word "conceivable" most nearly mean?

- A) Visible
- B) Simple
- C) Easy
- D) Possible

Kelp forests grow underwater along the chilly Pacific Coast. These underwater forests are important to fish and other marine animals. Ocean currents can be powerful and rough, making it difficult for marine animals to find safe places to hide from predation. The underwater forests slow down the currents. This creates a more _____ environment.

Which choice completes the text with the most logical and precise word or phrase?

- A) surprising
- B) dangerous
- C) tranquil

The recently observed gamma ray burst GRB 210307A lasted for 200 seconds, a burst generated by the merger of neutron stars. Bursts caused by neutron star mergers typically last fewer than 2 seconds. This makes GRB 210307A _____.

Which choice completes the text with the most logical and precise word or phrase?

- A) an oddity
- B) a coincidence
- C) a negative

Pteropods are small swimming snails with thin, delicate calcium carbonate shells. They are thought to be especially vulnerable to ocean acidification due to calcium carbonate's susceptibility to dissolution at lower pH values. Victoria L. Peck and colleagues recently found that the periostracum (a protective coating on pteropod shells) also exhibits this dissolution when intact. Moreover, the team was surprised to discover that even when the periostracum is breached, pteropods can still mitigate damage by rebuilding the inner shell wall.

Which choice best describes the main purpose of the text?

- A) To call for additional research on biological mechanisms that improve pteropod survival rates
- B) To present findings that suggest that the concern about the effects of ocean acidification on pteropod shells may be unwarranted
- C) To outline some of the ways ocean acidification has altered pteropod behavior over time
- D) To discuss the conclusion drawn in a study of calcium carbonate's role in protecting the periostracum of pteropods

San Francisco has high pedestrian traffic, but simply replicating a feature of San Francisco associated with walkability—e.g., its high density of storefronts—may be insufficient to indulge increased walking in other cities. As tributals Marsha Alkoura argues, our understanding of individuals' decision-making about whether to walk is inherently robust: create reliable emphasis on the role of demographic characteristics, directly to suit public transit availability, and so on, but walking decisions are made in complex contexts in which multiple conditions and needs inform individuals' choices.

What is better best states the main purpose of the text?

- A. To answer the difficulty of identifying a reliable way to increase walking in any given city
- B. To consider why it is challenging to compare the amount of pedestrians in different cities
- C. To describe the effect of a high density of storefronts on any given city's walkability
- D. To present a daim about how individuals' decision-making about walking can be improved

Gustyn He and colleagues studied a food-delivery phone app that is popular in China. The researchers found that having "no cutlery" automatically selected influences whether customers request disposable plastic utensils with their food orders. Based on their results, the researchers concluded that this and other small changes to the app could result about waste in China by as much as 3.26 million metric tons per year.

According to the text, which choice best describes a conclusion file and colleagues drew from their study:

- A. Profession of plastic waste in China is likely to increase in the near future.
- B. Food-delivery apps that prevent customers from requesting cutlery are becoming more popular.
- C. Customers who understand how food-delivery apps work make more environmentally friendly choices.
- D. Small changes to how a food-delivery app works can greatly lower plastic waste.

MIRANDA: "'Tis far off,
And rather like a dream than an assurance
That my remembrance warrants. Had I not
Four or five women once that tended me?"

PROSPERO: "Thou dost, and more, Miranda. But how is it
That this lives in thy mind? What seest thou else
In the dark backward and abysm of time?
If thou remember'st aught ere thou cam'st here,
How thou cam'st here thou mayst."

According to Prospero, if Miranda can remember anything from before life on the island,
what should she also be able to remember?

- A) The names of the women who once tended her
- B) The journey that brought her to the island
- C) The face of her mother
- D) The city where she was born
- ↓

Impact of Four Key Industries on Oklahoma Economy in APY

Industry	Approximate total contribution by industry	Number of people employed by industry	Average contribution per employee by industry
Tribal economic activity	\$7,312,400,000	\$1,074	\$141,510
Finance insurance	\$7,283,900,000	\$6,163	\$123,667
Wholesale trade	\$10,723,400,000	\$8,346	\$183,790
Administration/other	\$5,306,000,000	\$6,064	\$6,415

The Chickaway Nation and the nearby forty other tribes in Oklahoma operate numerous businesses and collectively generate billions of dollars. In revenue. Mining, including oil and natural gas production, is a key industry in the state as well. While researching other key industries in Oklahoma for an economic class, a student finds that the average amount contributed to the same economy in 2017 by each individual employed in wholesale trade was:

Which choice most **offerably** uses data from the table to complete the statement?

- A. \$ 141,510
- B. \$ 56,163
- C. \$ 183,790
- D. \$ 96,964

Minimum and Maximum Depths of Stony Cord Species in Caribbean and Indo-Pacific Waters

Species	Location	Minimum depth (meters)	Maximum depth (meters)
Agencia grahamae	Caribbean	20	115
Acropova busbyensis	Indo-Pacific	0	5
Mussa arcullum	Caribbean	5	30
Indophylla macassarensis	Indo-Pacific	20	25

A marine biologist is researching four stony coral species in Caribbean and Indo-Pacific waters, focusing on sightings of these species in the shallow zone (less than 30 meters below the surface) and the mesophotic zone (30 to 150 meters below the surface). Consulting the table, she notes that the smallest maximum depth is located in the:

Which choice most effectively uses data from the table to complete the statement?

- (A) Indo-Pacific waters in the shallow zone.
- (B) Caribbean waters in the shallow zone.
- (C) Indo-Pacific waters in the mesophotic zone.
- (D) Caribbean waters in the mesophotic zone.
